

The Electrical Contractor's Profit Secret!

RAPIDPULL™

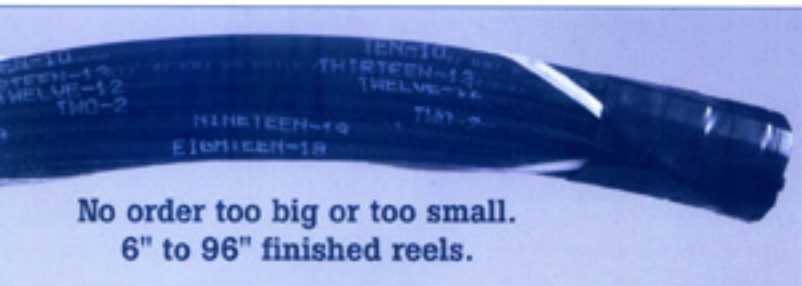

**Eliminates Ring
Out and Tagging of
Multiple Conductor
Cables! Saves Money
and Manhours!**

Rapidpull™ is a UL and CSA listed custom manufactured wire assembly built to your specifications. You can choose any combination of wire type, gauge, color and stranding - building wire, electronic cable, coax, and telecommunications. Each conductor within the assembly is printed with an alpha-numeric ID that is repeated every two inches

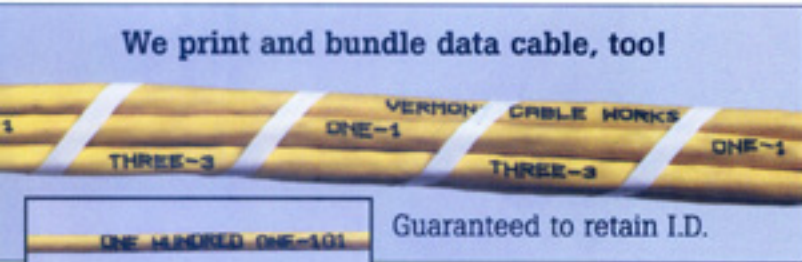

along the entire length. The conductors are factory bundled into a parallel configuration with either a waxed nylon binder or intermittent "pull tabs". Each bundle contains a sequential footage tape. The assembly arrives on your site prespooled, pre-tagged, ready to be "pulled". Best of all most orders ship in 48 hours. You save time and money!

Every cable custom made to your specifications

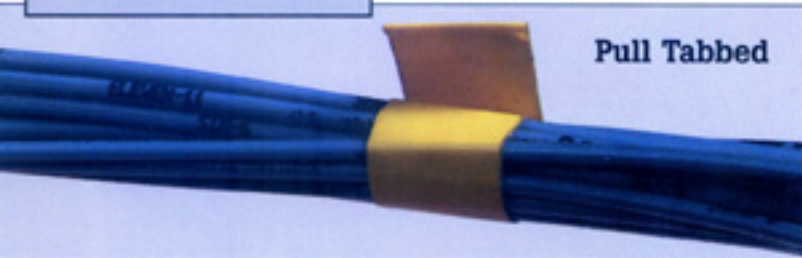

No order too big or too small.
6" to 96" finished reels.

We print and bundle data cable, too!

Guaranteed to retain I.D.

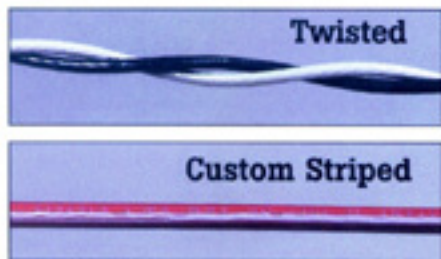

Pull Tabbed

Plenum Binders

Fast turnaround! Most orders ship in 48 hrs!

Twisted

Custom Striped

- Any combination of conductors
- Custom-tagged at no extra cost
- Sequential footage tape included
- Guaranteed to retain conductor I.D.
- Free pulling lube with every order
- UL listed and spark tested
- Made in America

Rapidpull Saves Time and Money

Rapidpull dramatically reduces installation time and waste. Because it is already "tagged" and bundled you simply pull one compact cable, then connect. Rapidpull helps prevent costly errors and on-site hassles. Plus, each cable is built to your specified length, eliminating waste and cutting on the job.

Custom Cabling

Rapidpull cables are unjacketed, and bundled with a military spec waxed nylon string that can incorporate almost any type or combination of building wire, data cable, coax, fire alarm and control cable. Our operation is capable of manufacturing cables up to 4 inches, plus, we can build drop cables for your staggered pulls. We also have a specialized data cabling line for bundling sensitive communications cable.

Custom Printing

Make your tags as simple or complicated as you like. Our printers use state-of-the art inkjetting to apply any alpha-numeric identification required, up to 254 characters, every 3 inches along the entire length of the conductor. Our customization capabilities are endless.

We can combine and bundle just about any configuration of conductors, power wires, data cables, category 5 cables, communications cables and fire alarm cables that you might need.

Sold exclusively through wire and cable wholesalers and distributors.

Any Job.

For example, on a 42 conductor/
550 ft. pull, you can complete
the job up to 68 man-hours
faster. That's a huge savings
in time and money!

◆ **Saves you time and money,
Makes pulling simple & easy.**

Because Rapidpull™ is already cut to length, wrapped to your requirements, pre-tagged and labeled with sequential footage tape, all you have to do is pull. The laborious, time-intensive ring-out (wire by wire) is eliminated. The time savings are impressive.

◆ **Just tell us what you need.**

Your job is custom-made and printed to your specifications at no extra cost. Any combination of wires, any length, with any alpha/numerical tagging.

◆ **Costs less.**

Compared to the cost of tagging individual conductors and fabricating cables on site, Rapidpull is less expensive. Cuts manhours, reduces installation time, minimizes waste and confusion.

◆ **Easy to Use.**

Just one cable to pull.

◆ **Spark tested and UL approved. Guaranteed to retain conductor ID.**

◆ **Fast, reliable delivery.**

Rapidpull™ cables are available in configurations using #2AWG thru #18AWG THHN, THWN, TFN, TFFN, XHHW, co-axial — or any unjacketed combination of power, control, or communications conductors you specify! Here's a quick reference chart for commonly used THHN cable. **All our assemblies are UL listed and spark tested.**

No. of conductors	#16 AWG TFFN/MTW		#14 AWG THHN/THWN		#12 AWG THHN/THWN	
	Approx. wt. lbs./1000 ft.	Approx. OD in inches	Approx. wt. lbs./1000 ft.	Approx. OD in inches	Approx. wt. lbs./1000 ft.	Approx. OD in inches
